

BACKUP GUIDE

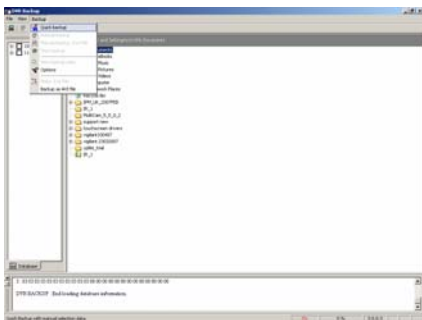

(Backups Under 2.0Gb of Data)

On the main live screen select the Floppy Disk Icon near the bottom right hand side of the screen.

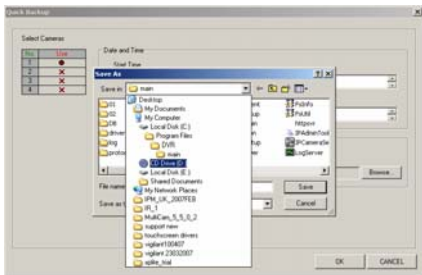

You will then be prompted to enter your Account ID:
Password:
Once u have done this click OK.

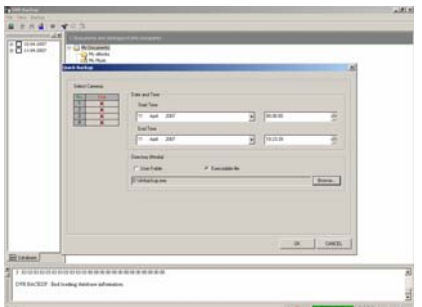

You are now in the DVR Backup screen
Select Backup then select Quick Backup from the drop down menu

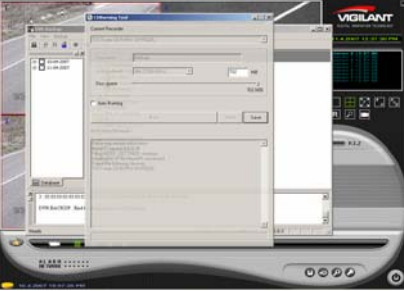

Select which cameras u would like to backup data from, Select the date u wish to backup and also the start and finish time.
Once u have done this make sure Executable File is selected and click the Browse button

(At this point please make sure there is a BLANK CD/DVD in the drive)
Select Save

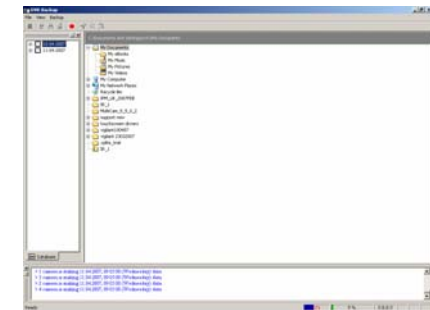

Once you have selected everything u require your screen will look similar to this.

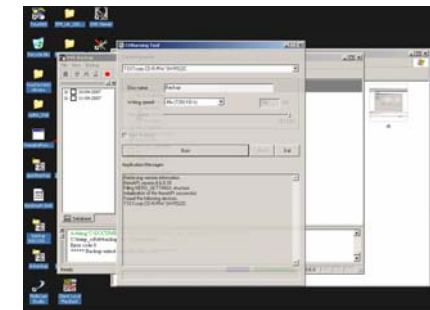

You will now see the Disc Burning properties screen. Make sure the Disc Space slider bar is dragged fully to the left and the box above does NOT say 0MB.

Click Save

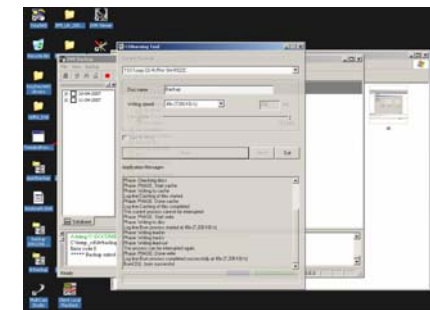

The system will now compile all the data you selected for the date and time.

A progress bar near the bottom right of the screen will indicate the percentage of the job that has been done.

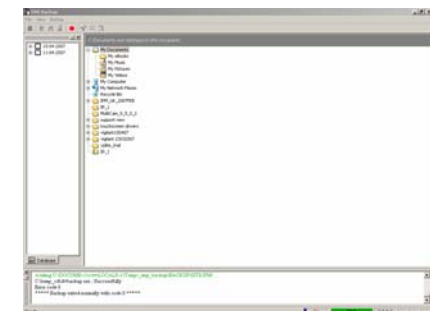

Select Burn.

The system will now burn all the data compiled onto the CD/DVD and eject the disc when finished.

Click Exit

In the status window u will see the message
*****Backup Exited Normally With Code 0*****

This means that everything has finished correctly u can now go to the top left of the screen Click File and then Exit.

This will return u to the main Live screen of the DVR and exit out of the backup program.
